Advanced BASF technology allows you to get the most out of every harvest. BASF is a global leader in crop protection and is a strong partner with the Australian horticulture industry. Together, we develop innovative products to improve crop quality and yields.

Key benefits:

- Market leading crop protection technology – providing novel solutions to increase crop quality and yields
- Novel fungicides that deliver high levels of disease control
- BASF supports growers and agronomists with technical advice and sales support

Product Portfolio

Product	Strengths	Impact	Controls
I Regent® 200SC	<ul style="list-style-type: none"> Effective insecticide for control of a key trunk borer pest 	<ul style="list-style-type: none"> Provides a control option for this problematic pest 	Fig longicorn
F Vivando®	<ul style="list-style-type: none"> New mode of action for powdery mildew control Contact and vapour activity Rainfast within one hour 	<ul style="list-style-type: none"> An effective tool for fungicide resistance management Vapour activity further helps protect developing bunches from powdery mildew Flexibility of application timing 	Powdery mildew
F Zampro®	<ul style="list-style-type: none"> Novel combination of Initium® and dimethomorph Two different modes of action 	<ul style="list-style-type: none"> Built in resistance management with no need to tank mix 	Downy mildew
F Polyram® DF	<ul style="list-style-type: none"> Multi-site protectant for the control of multiple diseases Premium formulation 	<ul style="list-style-type: none"> Versatile protectant fungicide Disperses easily in water and stays in suspension 	Black spot, downy mildew, phomopsis cane and leaf spot
F Cabrio®	<ul style="list-style-type: none"> Controls both downy and powdery mildews Flexibility of application timing Compatible with a wide range of crop protection products 	<ul style="list-style-type: none"> Control of these two key diseases Can be used on grapes destined for export wine until berries are pea-size Can be tank mixed with other modes of action for effective resistance management 	Downy mildew and powdery mildew
F Filan®	<ul style="list-style-type: none"> Controls both botrytis and powdery mildew 	<ul style="list-style-type: none"> Effective control of these two key diseases 	Botrytis and powdery mildew
F Delan® 700 WG	<ul style="list-style-type: none"> Highly effective multi-site protectant 	<ul style="list-style-type: none"> Effective early season downy mildew control option also providing control of black spot and phomopsis 	Downy mildew, black spot, phomopsis cane and leaf spot
F Acrobat® SC	<ul style="list-style-type: none"> Systemic, rapidly rainfast 	<ul style="list-style-type: none"> Active ingredient limits disease spread by rupturing fungal cell walls Application flexibility, rainfast in one hour 	Downy mildew

Insecticide

Fungicide
