Advanced BASF technology helps you to get the most out of every harvest of your potato crop. BASF is a global leader in crop protection and a strong partner with the Australian horticulture industry. Together we develop innovative products to improve crop quality and yields.

Key benefits:

- Market leading crop protection technology - providing novel solutions to increase crop quality and yields
- **Regent** 200SC insecticide will ensure early crop protection
- Novel fungicides to deliver high levels of disease control
- BASF supports growers and agronomists with technical advice and sales support

Product Portfolio

	Product	Strengths	Impact	Controls
I	Regent® 200SC	<ul style="list-style-type: none"> • Pre-planting insecticide to protect your crop from the start 	<ul style="list-style-type: none"> • Protection from key soil-borne pests 	Wireworm, mole cricket, white fringed weevil
F	Aero®	<ul style="list-style-type: none"> • Locally systemic, translaminar control of early and late blight • Contains two novel active ingredients 	<ul style="list-style-type: none"> • Protection on underside of leaf • Ease of use, one product for effective protection from two key foliar diseases • Maximise yield potential • Improve tuber size 	Early blight / target spot and late blight
F	Polyram® DF	<ul style="list-style-type: none"> • Multi-site protection – preventative fungicide for early and late blight protection • Quality formulation reduces dust and foaming during mixing, dissolves fast and stays in suspension • Formulated with 14% Zinc 	<ul style="list-style-type: none"> • Premium formulation is easy to handle and disperses readily in water • Can be used in a tank-mixture with Acrobat SC • Zinc is a key nutrient for a healthy potato crop 	Early blight / target spot and late blight
F	Filan®	<ul style="list-style-type: none"> • SDHI chemistry – provides early blight prevention and strong residual control • Compatible with a wide range of crop protection products 	<ul style="list-style-type: none"> • Allows chemical rotation for early blight control • Low dose required for cost effective protection • For resistance management tank mix with Polyram DF for late blight protection 	Early blight / target spot
F	Acrobat® SC	<ul style="list-style-type: none"> • Systemic, controls late blight • Rapidly rainfast 	<ul style="list-style-type: none"> • Protection on underside of leaf • Active ingredient prevents disease spread by rupturing fungal cell walls • Application flexibility, rainfast in one hour 	Late blight

Insecticide

Fungicide
